**Email and Calendaring Migration to Roll out in Coming Months for Staff and Faculty!**

Over the coming months, faculty, staff, retirees, and undergraduate and graduate medical students will all be moving to a cloud-based email and calendaring solution. With increased storage and productivity possibilities, the project team is excited to introduce you to **McMaster Mail, powered by Microsoft 365**.

[The Office 365 Hub](#) provides information on how to prepare for this exciting change. Start preparing for your account migration today with the pre-migration checklist!

### Event Recap: Microsoft Teams April Training Sessions

Earlier this month, Microsoft hosted two training sessions exploring the features of Microsoft Teams. A huge thank you to Daniel Kwan from Microsoft for facilitating the sessions and providing tips and tricks to more efficiently use Teams. If you missed the training, McMaster IT community member Kunal Tandan created training videos based on current available features for the McMaster community. This playlist is available [here](#).

## THE MCMASTER CYBER SECURITY SQUAD

IDENTIFY. REPORT. DELETE

PROTECTING MCMASTERU!

Awareness is the best defense against cyber security threats and we all have to be hyper-vigilant while [working from home](#). Combating cyber security threats is a team effort and all McMaster community members have a role to play. [Join the squad and check out other cyber security resources here.](#)

### Items of Interest

#### CanSSOC Threat Feed Pilot Service Webinar: Tues. May 12

The Canadian Shared Security Operations Centre (CanSSOC) is hosting a webinar on **Tuesday May 12 from 1:00 p.m. – 2:00 p.m. EDT** to launch its Threat Feed pilot service.

The threat feed collaboration platform provides a sector-specific threat intelligence (TI) repository with specialized feeds for current and educational-specific threats. As a pilot service, members will receive blacklist and whitelist internet protocol (IP) feeds for sites to deploy directly into protection solutions. CanSSOC analysts will aggregate and curate essential TI data and members will be able to easily share their own TI back to the platform.
